

COMPUTERS

DISCUSSION QUESTIONS

A2

1. What is a computer?
2. Do you use a computer at home or school? For what?
3. Can you name different parts of a computer?
4. How do you feel when you use a computer?
5. Do you play games on a computer? Which ones?
6. How do you use the internet on a computer?
7. What do you think computers will be like in the future?
8. Is it easy or hard for you to use a computer? Why?
9. What is your favorite thing to do on a computer?
10. Do you think computers are important? Why?
11. Have you ever had a problem with a computer? What happened?
12. Do you know how to type on a computer?
13. What is the difference between a laptop and a desktop computer?
14. How does a computer help you with your homework?
15. Do you use a computer to talk to friends or family?
16. What do you think is the most important part of a computer?
17. Can you draw a picture of a computer?
18. Have you ever learned something new using a computer?
19. Do you think computers are good for kids? Why?
20. What would you do if you didn't have a computer?

B1

1. How has technology changed the way we use computers?
2. What are the advantages and disadvantages of using computers?
3. How do you ensure your safety while using the internet on a computer?
4. Do you think computers have improved education? How?
5. What is your opinion on artificial intelligence in computers?
6. How do computers impact your daily life?
7. Discuss the role of computers in the workplace.
8. What do you think about the addiction to computer games?
9. How can computers be used to solve real-world problems?
10. Discuss the environmental impact of computers.
11. How has the evolution of computers changed society?
12. What do you think about online privacy and computers?
13. Discuss the future of computer technology.
14. How do computers affect communication?
15. What is the most innovative use of computers you've seen?
16. Do you think everyone should learn basic computer skills? Why?
17. How can computers be made more accessible to everyone?
18. Discuss the importance of computer security.
19. How do social media platforms on computers influence us?
20. What is the role of computers in entertainment?

B2

1. Discuss the ethical implications of computer technology.
2. How have computers changed the landscape of education?
3. Explore the significance of open-source software in computing.
4. Analyze the impact of computers on human productivity.
5. Discuss the role of computers in modern scientific research.
6. What are your thoughts on the digital divide and computer access?
7. How have computers affected global communication?
8. Explore the role of computers in healthcare advancements.
9. Discuss the balance between convenience and privacy in computer use.
10. How do computer algorithms influence our choices?
11. Analyze the effects of computer-based automation on employment.
12. Discuss the importance of computer literacy in today's world.
13. How can computers contribute to sustainable development?
14. Explore the evolution of graphic design with computer technology.
15. What are the challenges of cybersecurity in the digital age?
16. Discuss the cultural impact of computers globally.
17. How do computers and the internet influence political movements?
18. Analyze the role of computers in financial systems.
19. Explore the impact of computer gaming on youth culture.
20. Discuss the future trends in computer hardware and software.

C1

1. Analyze the role of quantum computing in future technological advancements.
2. Discuss the ethical considerations in the development of AI.
3. Explore the impact of cloud computing on data management and security.
4. Examine the influence of computers on language evolution.
5. Analyze the social implications of the Internet of Things (IoT).
6. Discuss the challenges in bridging the global digital divide.
7. Explore the role of computers in shaping political discourse.
8. Analyze the effect of computer technology on environmental sustainability.
9. Discuss the psychological effects of prolonged computer use.
10. Explore the future of human-computer interaction.

C2

1. Critique the role of computer algorithms in decision-making processes.
2. Explore the implications of AI and machine learning on society and ethics.
3. Analyze the impact of big data and analytics on privacy and individual rights.
4. Discuss the philosophical aspects of virtual reality and human perception.
5. Examine the role of computers in the evolution of global economies.
6. Analyze the potential of computers in revolutionizing medical diagnostics.
7. Discuss the societal impact of widespread automation and robotics.
8. Examine the ethical considerations of biometric data usage in technology.
9. Analyze the influence of computers on cultural and social dynamics.
10. Explore the long-term implications of dependency on computer technology.
